## PROJECTS

### Fake Shop Website

Developed a Fake Shop website as a personal project using HTML, CSS, and vanilla JavaScript, the project demonstrates proficiency in creating responsive and visually appealing user interface. Key features include product listings, dynamic filtering, and simulated checkout functionality, showcasing abilities in frontend development and user experience design.

### EMI Calculator Web Application

Created and deployed an EMI (Equated Monthly Installment) calculator web application using HTML, CSS, and JavaScript. Designed to help users estimate loan repayments, the application allows dynamic input of principal amount, interest rate, and loan tenure to calculate accurate EMIs. This project showcases strong analytical and problem-solving skills through the integration of financial calculations into a user-friendly web too.

### Personal Portfolio Website

Crafted and launched a personal portfolio website to elegantly showcase professional accomplishments and capabilities. Engineered using cutting-edge web technologies such as HTML, CSS, and JavaScript.
