Projects

Fake Shop Website

- Developed a Fake Shop website (link: <https://ankitt-rajput.github.io/Fake-shop/>) as a personal project to enhance skills in web development and frontend design. Implemented using HTML, CSS, and vanilla JavaScript, the project demonstrates proficiency in creating responsive and visually appealing user interfaces. Key features include product listings, dynamic filtering, and simulated checkout functionality, showcasing abilities in frontend development and user experience design.

EMI Calculator Web Application

- Created and deployed an EMI (Equated Monthly Installment) Calculator web application (link: <https://ankitt-rajput.github.io/Emi-calculator/>) using HTML, CSS, and JavaScript. Designed to help users estimate loan repayments, the application allows dynamic input of principal amount, interest rate, and loan tenure to calculate accurate EMIs. This project showcases strong analytical and problem-solving skills through the integration of financial calculations into a user-friendly web tool.

Personal Portfolio Website

- Crafted and launched a sophisticated personal portfolio website (link: <https://ankitt-rajput.github.io/Ankit-Portfolio/>) to elegantly showcase professional accomplishments and capabilities. Engineered using cutting-edge web technologies such as HTML, CSS, and JavaScript, with meticulous attention to responsive design principles for seamless user experience across all devices. Integrated sections meticulously highlighting key projects, skills, and contact details, embodying a seamless blend of creativity in design, technical proficiency in web development, and strategic presentation of professional achievements.
